

## Our mission

It is the mission of the American Council on Criminal Justice Training to provide education and training that enhances the public's safety. We provide training that enhances the personal safety of grade school and daycare center children, high school and college students, employees of the private and public sectors, family members, and the elderly. There is no more noble or worthwhile endeavor that we can pursue.

Unlike a for profit company, the nonprofit organization does not produce material goods to sell for the generation of profits to finance its activities. A nonprofit public safety education institution's product is a safer child, a safer school, a safer workplace, and a safer community.

How can one place a price tag on a person's safety? One cannot.

Therefore, we hope you will take advantage of our offer of free public safety education training for your personal safety or the safety of your family, organization, community, or employees.
