

Confrontational Simulation for the Armed Citizen

Confrontational Simulation is a scenario-based use of force and tactics training program. In this course, civilian students learn through realistic confrontational scenarios to properly apply non-deadly and deadly force in self-defense.

Offers information regarding:

- Proper use of non-deadly and deadly force by a citizen in self-defense
- Personal self-defense tactics against unarmed attacks
- Proper use of pepper spray in an assault situation
- Defense against an edged weapon attack
- Proper use of a firearm in self-defense
- Defense against a club attack
- Proper flashlight tactics
